MOJALEFA MINING

COMPANY PROFILE · 2026

Surface mining excellence - moving earth, extracting value, restoring land.

WHO WE ARE

A full-cycle surface mining partner

Opencast Mining is a specialist surface-mining contractor delivering the complete open-pit cycle — from planning and overburden removal through ore extraction, haulage and progressive land rehabilitation. We operate our own fleet and embed our teams alongside clients to run safe, productive, and predictable operations.

40+

YEARS EXPIERANCE

LEADERSHIP

Board of directors

The people steering our surface-mining operations and long-term strategy.

WHAT DRIVES US

Vision, mission & values

VISION

To be the surface-mining partner of choice — recognised for safety, reliability and leaving land better than we found it.

MISSION

To move earth efficiently and responsibly, delivering ore to our clients on plan while protecting our people and the environment.

OUR VALUES

01 Safety first

02 Operational excellence

03 Environmental stewardship

04 Partnership

CAPABILITIES

What we do

01

Overburden removal

Drill-and-blast, stripping and load-and-haul to expose the ore body safely & crushing & screening ore.

02

Ore extraction & haulage

Selective mining, grade control and high-volume haulage that keeps the plant fed.

03

Fleet & equipment

Owned, well-maintained fleet with real-time monitoring to maximise availability.

04

Rehabilitation & closure

Progressive backfilling, reshaping & replanting integrated into the mine plan.

Everyone home, every shift

Safety is our licence to operate. A standardised management system, visible leadership and continuous training keep our people and communities protected across every site.

Skills Development

- **Commitment to Skills Development:** Invest in continuous training and professional development for all employees.
  Knowledge Transfer: Ensure technical, operational, safety, and leadership skills are shared across the workforce.
- **Community Empowerment:** Provide training, mentorship, apprenticeships, and practical work experience to local communities.
- **Local Employment:** Develop local talent to increase employment opportunities and reduce reliance on external skills.
- **Sustainable Growth:** Build a skilled workforce that supports long-term business success and creates a lasting positive impact in the communities where we operate.

REHABILITATION IN PROGRESS

SUSTAINABILITY

Restoring land as we mine it

Rehabilitation is built into the mine plan from day one — progressive backfilling, landform reshaping, topsoil replacement and native replanting run in parallel with extraction, not after it.

THE OPENCAST ADVANTAGE

Why partner with us

Predictable delivery

Fixed-plan production with transparent reporting — you know what moves, and when.

Owned fleet, high uptime

We invest in and maintain our own equipment, so availability isn’t a problem.

Safety-led culture

A single, audited safety system applied identically across every operation.

Closure built in

Rehabilitation runs alongside mining, reducing your long-term liability.
